Highlights

Orthodontic teat

Flat, drop-shaped symmetrical teats respect the natural development of your baby's palate, teeth and gums, even if the soother ends upside down in the mouth.

User-friendly silicone teats

The silicone teat is taste and odour-free so it's more likely to be accepted by your baby. The silicone is smooth, transparent, easy to clean and it doesn't get sticky. The teat is strong, long-lasting and won't become mis-shapen or discoloured over time.

Snap-on protective cap

To keep sterilised teats hygienic

Security ring handle

For easy removal of the soother at any time

Issue date 2011-11-16
